tyrosine 3-monooxygenase (BC 1.14.16.2) - quail
N;Alternate names: tyrosine 3-hydroxylase
C;Species: Phasianidae gen. sp. (quail)
C;Date: 19-Nov-1988 #sequence_revision 19-Nov-1988 #text_change 31-Mar-2000
C;Accession: A28582; PHI524
R;Fauquet, M.; Grima, B.; Lamouroux, A.; Mallet, J.
J. Neurochem. 50, 142-148, 1988
A;Title: Cloning of quail tyrosine hydroxylase: amino acid homology with other hydro.
A;Reference number: A28582; MUID:88089590; PMID:2447231
A;Accession: A26582
A;Molecule type: mRNA

tyrosine 3-monooxygenase (EC 1.14.16.2), major splice form - fruit fly (Drosophi)
N;Alternate names: tyrosine 3-mydroxylase, type 1; tyrosine 3-hydroxylase, type 1;
N;Contains: tyrosine 3-monoxygenase, minor splice form
C;Species: Drosophila melanogaster
C;Date: 10-Sep-1999 #sequence revision 10-Sep-1999 #text_change 21-Jul-2000
C;Accession: A55369; B55489; JN0010

A,Status: translated from GB/EMBL/DDBJ
A,Molecule type: DMA
A,Rote: mutant sequence found in patients with phenylketonuria
A,Gross-references: GB.862392; NID:9238240; PIDN:AAB20205.1; PID:9238241
A,Genetics: mutant sequence found in patients with phenylketonuria
C,Genetics: DB:119470; OMIM:261600
A,Genetics: Lidy GB:119470; OMIM:261600
A,Map position: 12q24.1-12q24.1
A,Note: a defect in this gene can cause phenylketonuria
C,Genetics: homodimer
C,Genetics: homodimer
C,Function:
A,Description: catalyzes the 4'-hydroxylation of phenylalanine to tyrosine by tetrahydroh
A,Pescription: catalyzes the 4'-hydroxylation of phenylalanine catabolism
C,Superfamily: phenylalanine 4 monooxygenase
C,Keywords: biopterin; homodimer; iron; metalloprotein; monooxygenase; oxidoreductase; p?15/Binding site: phosphate (Ser) (Govalent) (by calmodulin-dependent kinase) #status predicte
F;285,290,330/Binding site: iron (His, His, Glu) #status predicted
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            phenylalanine 4-monooxygenase (EC 1.14.16.1) - mouse
